

SKILLS

- **Automotive & Industrials**
- **Energy & Utilities**
- **Infrastructure**
- **Private Equity & Venture Capital**
- **Innovation**

Alberto is a nuclear engineer, graduating from the Polytechnic University of Turin in 1996. He later obtained an MBA from SDA Bocconi.

He began his career at CERN in Geneva, within the development team for experiments on the LHC accelerator. He then worked at UBS Warburg in London, in the M&A group dedicated to the technology sector.

Since 2002, he has worked for Value Partners, a strategic consulting firm, where he became a Senior Partner. Over his approximately twenty years with the firm, he has worked with large multinational groups operating in various industrial sectors (automotive, components, transportation, energy, infrastructure, materials), supporting management in the development of industrial and strategic plans, M&A projects, investment direction, and technological innovation. Since 2015, he has also been part of an "angel" club investing in innovative start-ups. Since 2019, with MITO Technology, he has managed a Venture Capital fund platform dedicated to the enhancement of technologies with a significant impact on the sustainability of industrial processes.

At D&P, Alberto serves as a Senior Advisor focusing on technological and digital innovation projects (Innovation LAB).
