Alfonso is a mechanical engineer, having graduated with honors from the University of Naples.

He has worked for an extended period within the ACEA Group, holding various managerial and senior-level positions, boasting a track record in the Energy, Cogeneration, and Renewables sectors.

He served as President of Ecogena, Sole Director of Acea Networks and Energy Services, Development Manager for Renewable Sources at Acea Production, and Sole Director of Acea Solar.

He has developed a pipeline of approximately 700 MW of photovoltaic plant projects, located in central-southern Italy, with about 250 MW authorized, of which 60 are already in operation.

At D&P, Alfonso serves as a Senior Advisor in the role of Director of the Energy Infrastructure division.
