

SKILLS

- **Operational Excellence**
- **Infrastructure & Facility Management**
- **Energy**
- **Change Management**
- **ESG (Environmental, Social, and Governance)**

Maurizio is a mechanical engineer graduated from the University of L'Aquila. He began his career working with engineering companies where he coordinated projects for the expansion and conversion of important continuous-cycle manufacturing sites. After strengthening his technical and managerial skills through specific training activities carried out in Italy and abroad, he worked for about 12 years at the American multinational Micron Technology, where he held managerial positions of increasing responsibility in the management and maintenance of strategic production infrastructures, eventually becoming the director of plant general services.

For about 10 years, he worked for LFoundry (an Italo-German group) and later for SMIC (a Chinese multinational), holding managerial roles in engineering and construction, dealing with projects in the energy & utilities sector, production infrastructures (clean rooms), data centers, and cogeneration plants, also acting as an attorney.

He is also the founder and CEO of Unica Ingegneria Group for about 3 years, a company providing services and strategic consulting to multinational companies in the pharmaceutical, semiconductor, and services sectors, for the development and implementation of innovative programs and projects aimed at improving efficiency and decarbonizing industrial sites. He has served as Deputy Director for Energy Policies on behalf of Confindustria Abruzzo and is currently a member of the Board of Directors of Confindustria L'Aquila.

At D&P, Maurizio serves as Director of Supply Chain.
